Public Printer Names 5 New Members to Depository Library Council

Public Printer of the United States Robert W. Houk has named five new members to the Depository Library Council to the Public Printer. The Council advises the U.S. Government Printing Office on issues related to the public access to Government publications through the Federal Depository Library Program (FDLP). Administered by GPO, the FDLP provides Government publications free of charge to over 1,400 libraries in the United States and its territories.

The Federal Depository Library Program is one of the major means by which the Federal Government fulfills its information dissemination responsibilities to the citizenry. In fiscal year 1991, more than 26.4 million copies of 56,000 individual publications in paper, microfiche, and electronic formats were distributed to depository libraries.

The five new members bring diversified experience to the Council. William C. Cassell, President, Heidelberg College, Tiffin, OH, provides academic representation from the small college perspective and served on the Advisory Committee, White House Conference on Library and Information Services.

William W. Ellis, Associate Librarian for Science and Technology Information, Library of Congress, Washington, DC, brings expertise in planning and formulating new initiatives in science and technology information.

Carol D. Gordon, Assistant Coordinator of the General Materials and Services Department, Milwaukee Public Library, Milwaukee, WI, fills a key role in representing the Nation's public library system.

Judith S. Rowe, Manager of Research Services, Princeton University Computing and Information Technology, Princeton, NJ, is a recognized expert on issues relating to access to public data and has managed the Princeton-Rutgers Census Data Project for more than 20 years.

John H. Sulzer, Associate Reference Librarian, Head, General Reference Section, Pattee Library, the Pennsylvania State University, University Park, PA, has chaired the Government Documents Round Table of the American Library Association.

Approximately 50 "regional" depositories receive all publications distributed through the FDLP for permanent retention, to ensure that archival resource collections of Government documents remain available throughout the United States. The remaining "selective" depositories may choose to receive only specific categories of Government publication to meet local needs. In return for receiving Government documents at no cost, depository libraries make them available to the public, and provide appropriate assistance with their use, free of charge.

The Depository Library Council to the Public Printer consists of 15 representatives of the Government information community, who serve for a term of 3 years. The Council meets twice yearly, with its spring 1992 meeting set for April 28, in Washington, DC. At that time members will focus primarily on issues relating to GPO and its electronic future. The newly appointed members will be introduced to Council activities and procedures at the spring meeting, and will serve a term from October 1, 1992, through September 30, 1995.

For Faster Service, Use Your Depository Library Number

Almost all depository library records maintained by the Library Programs Service (LPS) are accessible primarily by the depository library number. When a number is omitted, LPS staff must spend extra time looking it up. When an incorrect number is supplied by the depository library, changes may be made to another library's records. This can be disastrous when amending item selections!

Please include your correct depository library number in all correspondence with the Library Programs Service!

Your Suggestions Wanted For 1993 Regional Depository Seminar Program!

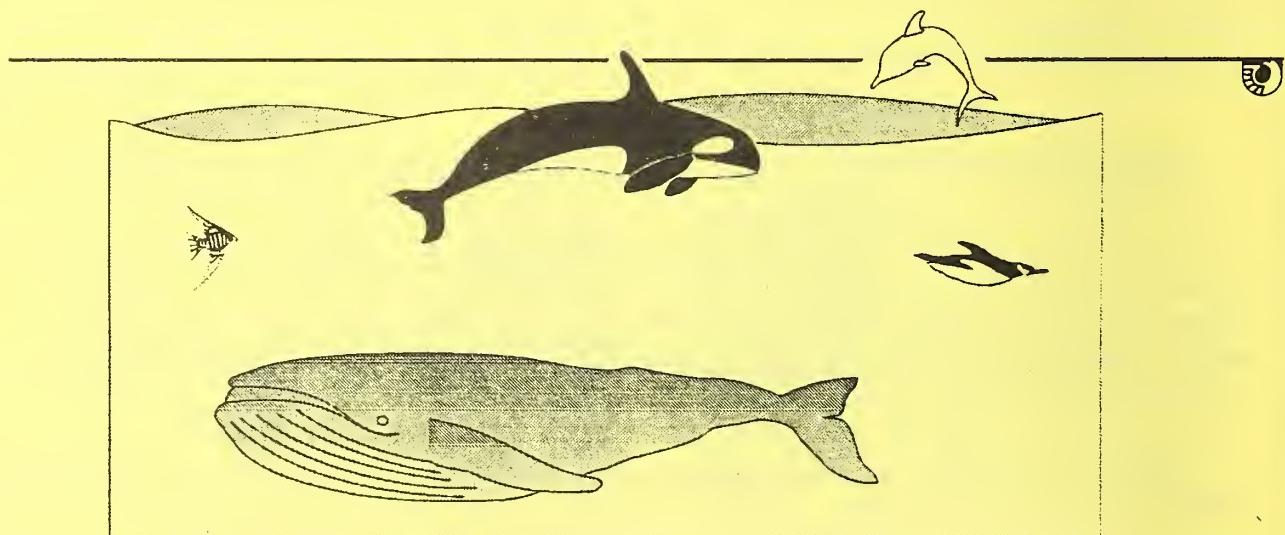

A task force of three Regional Librarians has been formed to develop a program for the 1993 Regional Depository Seminar. This seminar will be held in conjunction with the next meeting of the Federal Depository Conference.

U.S. Government Printing Office (GPO) Begins Pilot Program to Sell Surplus Government Publications

Public Printer of the United States Robert W. Houk has announced a pilot program to sell surplus Government publications in GPO's Publications Sales Program to the highest bidder. Previously, such publications could only be sold to paper dealers as scrap. If successful, the new program, which has been authorized by the congressional Joint Committee on Printing, will permit GPO to dispose of surplus publications cost-effectively while providing an opportunity for their continued dissemination to the public. Under the program, individual titles, in lots of varying sizes, will be made available.

To be placed on the bid list and receive information about the publications available, contact: U.S. Government Printing Office, Materials Management Service, Surplus Publications, Washington, DC 20401, or call Joel A. Hettger, (202) 512-0937.

GPO Introduces Publications Payment Option For Volume Purchasers and State and Local Governments

Public Printer of the United States Robert W. Houk has announced the introduction of a pilot program which allows qualified customers to order publications sold by the Government Printing Office (GPO) which will be billed for payment through a monthly account statement. The new Fill and Bill Program is intended to facilitate and encourage the sale of Government publications to book dealers, State and local governments, and other volume purchasers.

To qualify for the Fill and Bill Program, customers must have no outstanding balance with the GPO and must fall into one of the following categories:

- 1) Purchasers of more than \$10,000 in publications from the GPO in the past year;
- 2) Purchasers of more than \$5,000 a year in publications from the GPO for the past 5 years;
- 3) Institutions receiving at least 50 percent of their funding from State and local governments.

Approved applicants will receive an account number, ordering information and a supply of special order forms. A predetermined limit will be established for each account and orders must be for a minimum of \$50. An account statement detailing all charges will be sent monthly.

Fill and Bill customers may place orders by mail, telephone, or fax at GPO's Central Office in Washington, DC. On-site and telephone pick-up orders will be accepted at GPO's Warehouse Sales Outlet in Laurel, MD.

For additional information about GPO's Fill and Bill Program, or to obtain a Fill and Bill application form, please contact:

Columbiana: A Guide to Selected Materials on Christopher Columbus Published by the U.S. Government, 1824 - 1991

With the October 1992 Columbus Quincentenary Jubilee just around the corner, many of us will be called upon to identify and select materials on Christopher Columbus in support of library exhibits, bibliographic instruction, and in fulfillment of personal as well as professional information needs. To plan for the October 1992 Columbus Quincentenary Jubilee, librarians and educators seeking materials on the discovery of America may turn to the following list of selected government publications as a guide to items suitable for display in library or classroom exhibits and for inclusion in pathfinders and professional presentations.

Many items listed in the bibliography contain illustrations depicting Columbus, ancient maps and charts, and encounters with Native Americans, which would be suitable for inclusion in library exhibits, scholarly papers, and presentations; brief annotations contain references to illustrated material. Of note are two papers in the *Smithsonian Miscellaneous Collections*, the Links's theory on Columbus's voyage to the Grand Caicos in the Bahamas (1958), and Wolper's study on identifying the location of Columbus's first landing (1964). Both touch upon the controversy over the place of his first landfall and contain detailed charts and maps that show the probable route of Columbus on his first voyage to the New World. Entries are arranged alphabetically by title into 4 categories: journals and journal articles, monographs, and reports. All the works relate to Columbus, his life and voyages. Superintendent of Documents call numbers are enclosed in brackets (except for articles published in *Smithsonian*).

Excluded from the bibliography are House and Senate documents as well as references to legislation in support of the Christopher Columbus Quincentenary Jubilee and the national commission for the Quincentenary, respectively. However, librarians wishing to research these legal documents, including legislation passed in support of the World's Columbian Exposition held in Chicago in 1893 and considered the greatest international fair of its time, may consult the *Monthly Catalog to U.S. Government Publications*; the *CIS U.S. Serial Set Index*; and *The Christopher Columbus Encyclopedia*, by Silvio A. Bedini (New York: Simon and Schuster, 1991).
